

# Creating a Lesson Plan Using Gagne's Nine Events of Instruction

---

# Lesson Plan

Think about your course and create a detailed plan for designing your learning solution based on Gagne's Nine Events of Instruction.

## 1. Gain attention.

What would you do at the beginning of the course to grab learners' attention?

Which attention getting techniques would you use throughout the course to keep your learners' interested?

## 2. Inform learners of objectives.

What do you want learners to be able to do at the end of the course and what tools they may be using to achieve learning objectives?

### 3. Stimulate recall of prior learning.

How can you relate the new lesson to situations that the learners are familiar with?

#### 4. Present the content.

What are the key points of your lesson?

What techniques would you use to keep the learners' attention and increase comprehension of the material?

## 5. Provide guidance.

How can you cut the information into smaller chunks?

What can you add to your course presentation to help learners build on what they already know and master the content presented in the lesson?

## 6. Elicit performance.

What strategies would you use to elicit participation?

## 7. Provide feedback.

What type of feedback would you provide?

Do you plan to include automated means for learners to assess where they stand?

## 8. Assess performance.

How would you confirm mastery of the objectives?

How would you assess learners' progress?

## 9. Enhance retention and learning transfer..

How can you provide the opportunity for learners to apply the outcome of their training to a real-world situation?

### Notes:

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
