eLearning World

Innovative writing for eLearning, technology and education

Congratulations!

We've now come to the end of *How to Design Successful ELearning Courses*. I sincerely hope that you found it valuable. Please note that while the steps covered in this training are essential for creating successful eLearning solutions, this is just the beginning of your eLearning journey. There is a lot more that instructional designers need to know about learning theories, instructional methods, content organization and chunking, storyboarding, deliverables, assessments, and evaluations as well as about a myriad of other instructional design topics. Remember, instructional designers are life-long learners and your learning journey should never end.

I wish you all the best in your instructional design journey!

Please do keep in touch and share your progress!

Take care,

Marina.

P.S. Do you want to learn how to create engaging, results-oriented eLearning courses that people love and want to finish? Enroll in my Instructional Design for ELearning program:

<https://yourelearningworld.thinkific.com/bundles/instructional-design-for-elearning-program>

Here is what you will be able to do upon program completion:

- Boost engagement, increase learning transfer, and enable behavior change with eLearning courses
- Design next-level eLearning using the latest trends in adaptive instruction, mobile platforms, and microlearning.
- Apply adult learning principles, current theories, methodologies, and techniques to increase learning effectiveness and decrease costs
- Design eLearning interactions that increase engagement, provide hands-on learning experiences and improve performance
- Analyze, design, develop, implement, and evaluate your own eLearning courses
- Effectively collaborate with Subject Matter Experts (SMEs)
- Manage your eLearning projects effectively and efficiently using traditional and agile methodologies
- Create your own eLearning portfolio
- Demonstrate knowledge, skills, and creativity related to eLearning instructional design
